

## **# Project Title**

A simple overview of the use/purpose of your project

## **## Description**

An in-depth paragraph about your project and overview of use.

List of directories/files and a short description for each

## **## Getting Started**

### **### Dependencies**

\* Describe any prerequisites, libraries, OS version, etc., needed before installing the program.

### **### Installing/Compiling**

- \* How/where to download your program
- \* Any modifications needed to be made to files/folders
- \* How to install or compile your program

### **### Executing program**

- \* How to run the program with sample commands
- \* Step-by-step bullets with sample inputs & outputs

...

code blocks for commands

...

## **## Help**

Any advice for common problems or issues

...

command to run if the program contains helper info

...

## **## Authors**

List of authors/contributors' names and contact info

## **## Version History**

- \* 0.2
  - \* Various bug fixes and optimizations
  - \* See [commit change]() or See [release history]()
- \* 0.1
  - \* Initial Release

## **## License**

This project is licensed under the [NAME HERE] License - see the LICENSE.md file for details

## **## Acknowledgments**

Inspiration, code snippets, etc.
